# Editors Introduction

Where to start unfortunately due to personal issues I have to start by apologising for the 99th issue arriving late and I am afraid it has been a bit of a rush job to get it finished and to the printers.

I would like to thank Graham Pearce for his support and for continuing to do a great job of updating the 'Anglers Against HS2' page on facebook for us and by doing so keeping you all up to date. As I am sure you are all aware at the end of consultation period our lovely government thought that it would be a great idea to start a second petition. If you have not already been through the process I urge you to sign the new official government petition at <http://epetitions.direct.gov.uk/petitions/353>. If anyone has any useful news regarding HS2 please send this over to either Graham or myself so we can get this in to circulation as quickly as possible.

The ongoing cormorant issue that all fisheries country wide has been taken forward with the launch of 'Cormorant Watch'. Please check out the website [www.cormorantwatch.org](http://www.cormorantwatch.org) where you can find out more and also when you see said birds (I am being polite) you can log these and in the future this may help resolve the issue in the long run.

It would seem even with the odd weather that we have had so far this year that the fishing has continued to be very good at times and from those of you I have seen on the bank have had some good catches. In the small amount of time I have been out this year I have had some great fun catching carp early in the traditional close season on Harefield Pit 1 and more importantly have spent a couple of days over Rowley enjoying the fantastic roach fishing. Whilst at Rowley

I did hook a crucian carp and will be making a trip back there in the summer to try and winkle one out! The rest of my fishing (camping) has been on Harefield Pit 2 and you will get an update on antics in the fishery report, only to say I did catch one of the tench, though I have to say it was not by design.

I would like to thank Mark at Baitcraft again for continuing to provide us with competition prizes and also for providing quality bait to many members, a lot of the carp pictures in this issue are thanks to his products. Check out the competition later in the magazine.

The next issue due in March will be number 100 and with that I want to make this a really special issue to celebrate. The 'Les Mead Memorial' trophy is up for grabs and it would be great to see a new name on there at the AGM in April.

When you send your pictures of your captures in I would appreciate if you could copy them to me as well, therefore avoiding having to have a picture of me on page 6.

Also a special thanks to Andrew Kempster for his help along the way, we will get out and do a feature next year and congrats for doing the treble again.

I am unable to attend the Special Members Meeting this month so I would like to quickly thank the bailiffs and officers of the club for all the hard work and to wish you the members all the best for the forthcoming months fishing (Fingers crossed some of the water stays bendy!)

**Laurence Butters**

Editorial Secretary

# From The Chair

The Society remains in a comfortable financial situation, the membership while down on last years is still healthy. The fisheries continue to produce quality fish as witnessed by the numerous fish reports. We will continue the restocking programme and have engaged a fishery consultancy service for Harefield No1 to consider all the options for improving our fishery. Further details will be provided by the fishery managers at them members meeting which will be held on 8.00pm Wednesday 16th November at the Horse and Barge, Harefield.

It is great to see a record Bream of 13lb 9oz caught from Harefield No2 by Bream specialist Phil Skidmore and not just by angler by accident, many congratulations Phil!

Please continue to report your catches on the website and send in your photos, it is great to see the wonderful specimens and all those happy faces!

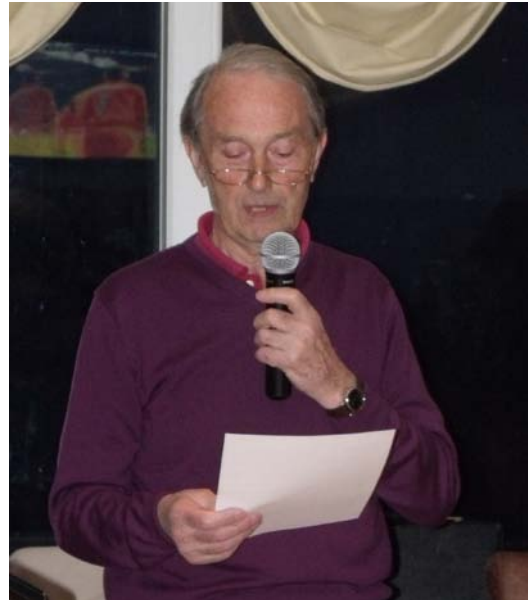

We are still operating under the shadow of the killer Carp disease KHV (Koi Herpes Virus) for which there is no known cure. Please use the tanks to dip your landing nets, unhooking mats and weight slings for 5-15 minutes before starting to fish. Any member found not to be taking these precautions may be liable to expulsion from the Society. If you see any dead or dying fish please report to the fishery manager or bailiff straight away. It is also very good practice to fully dry all your equipment before fishing again as this will kill the virus.

My thanks to all the Officers, Committee and Bailiffs for their hard work throughout the year, and to you the members for your continued

membership and enthusiasm without which the Society would not continue. An especial big welcome to our new Secretary Matt who took over the role from Terry Skelton at the last AGM, it is indeed a hard act to follow but Matt is showing great enthusiasm for his new role and he is settling in just fine.

## Vince Sutton

Chairman

Terry Skelton delivering his fairwell speech to the members at the AGM.

## Society Waters Season Dates

Harefield No 1

Open 15th March - 13th December  
Closed 14th December - 14th March

Harefield No2 & Rowley

Open 16th June - 14th March  
Closed 15th March - 15th June

NB: All dates are inclusive and you may only fish within these dates

# Curators Report

There have been a total of 209 reports so far this season, which is a small representation of the fish that have been caught from our waters by the members that have returned catch reports.

Please can I encourage others to send in details of captures so that the committee can use the information to effectively manage our waters and decide on any stocking polices to be applied to further improve our fisheries.

## Harefield Pit 1 - 179

The season started well and has fished steadily with plenty of carp caught and a reported 32lb mirror and tench to over 7lb and plenty of sport for the bream angler and for the float angler abounding perch and some good roach and Rudd to be had.

## Harefield Pit 2 - 4

All bream reports, well done to Phil Skidmore for his lake record 13lb 9oz.

## Rowley - 26

With carp to 29lb, tench to 7lb and bream to 5lb plenty of verbal reports of up to 6 fish in a night

And a stunning perch of 2lb 12oz caught by Dave Bernard and a also like pit 1 plenty for the float angler.

Phil Skidmore receiving his trophy 2011 AGM form Terry Skelton. Looks like he could be in with a shot again this year!!

# Society Matches 2011

Many thanks to all the members who took the trouble to take part and also to Mark Davis for shopping and cooking for the social match'

Unfortunately the remaining two matches on pit 1 and the 2nd on Rowley had to be cancelled due to a lack of applicants.

The results are as follows:

Social Match

Winner Mark Walker 63lb 0oz

Carp match

Winner Paul Rainford 59lb 11oz

Rowley match

Winner John Miles 12lb 5oz

*Brian Busby*

Curator

Carp match winner Paul Rainford with a 24lb 6oz common part of his winning match weight

## Harefield Tackle *online*

Harefield Tackle was established over 30yrs ago, giving us plenty of experience in customer service, and a wealth of knowledge amongst our staff.

We are a large and well stocked shop, spread over two floors. If you can't find what you are looking for on the website, give us a call ; And don't worry, we won't take your money if we don't have the product in stock!

Open 7 days, Sundays 9 - 12.45

At Harefield Tackle you will products from all the leading fishing tackle and bait manufacturers and local advice

01895 822900

2-4 High Street - Harefield - Uxbridge - Middlesex UB9 6BU

# Harefield Pit 1 Report

First and foremost Larry and I would like to thank Stuart Verity for his great work as our bailiff, many thanks also to John Westley who has been getting down to the lake when he can, for those who didn't know, John had a serious cycling accident earlier this year and is making a slow but good recovery and we appreciate his efforts. We would like to thank all those who turned up to do the working parties both the official work parties and those done unofficially.

The low water level in the lake has been a major concern this spring and summer, we were so worried that we asked the EA to have a look at the water and give any advice that they thought necessary, we also asked the EA if anything is being done about the amount of water being abstracted from the Colne Valley in general, they informed us that the local water company (Veolia) had been asked to keep water abstraction to a minimum. We are fortunate in as much that the overall depth of the lake is good even when the water level drops to its current level, I think that we have been lucky because we had such a bad summer and the water temperature did not climb so high that dissolved oxygen levels were diminished to a dangerous level, no fish were seen to be in distress and no losses were reported.

We discussed with our fishery consultants (Framlinghams) and the EA about our stocking levels and turning the back water on the eastern side of the arm into a stock or rearing pond, both parties said that they thought that the idea was a sound one and that many other clubs and societies have also invested in such projects, the subject has also been broached with our landlords and received favourable comments so far, detailed plans and costing have

yet to be draw up. Both advisers recommended that no further stocking of carp should take place and the EA would refuse to allow a number of F1 carp to be stocked although the water would support more tench, bream, roach and rudd.

## *Tench, bream & roach fishing*

Relatively few reports for tench and bream have been received this year and non for roach, Jim kedge used feeder tactics to land a 10lb-4oz bream plus several other good specimens, he also landed some good roach too. Mark Walker reported the best tench, a fine fish of 7lb 10oz, equalling the lake record.

A few members are having a go for the roach

The editor with a scaley upper twenty, he does catch occasionally!

now that autumn is here; I have caught a couple of fish pushing the 1lb mark along with many smaller fish and numerous small perch and a few rudd as well. They're there but we seldom see members seriously fishing for the roach and rudd which is a pity as some great sport can be had.

### *Carp fishing*

The season has so far has been generally good with a 32lb mirror carp being caught by Dave Willer and 26 other carp of over 20lb being reported and many more going unreported.

Dave Willer with his 32lb mirror carp

The Spring and May bank holidays proved popular dates to fish with around 15 anglers on the lake, even with such pressure the fish were feeding well. The May bank holiday weekend produced a combined weight of 600lb plus of carp caught. Mick Grice, Steve Jenner and I did the Sunday - Monday and had over thirty runs between us with over 25 fish put on the bank, the best a 28lb mirror for Mick.

### *Discipline and etiquette.*

This season we have noticed that the constant mention of littering problems in previous No1 fishery management reports seem to have finally paid off, virtually no litter has been found around the lake this season, fouling of swims and the land surrounding the lake has improved to with no problems reported. The one problem that still seems to come up with monotonous frequency is carp rigs and tackle in the trees and bushes around the banks of the lake, this season over 25 rigs have been removed and once the trees drop their leaves we will

undoubtedly find many more, if you lose tackle this way please let the bailiffs, Larry or myself know where it is and we'll do our best to retrieve it ASAP. Another problem that comes up all too regularly is members wandering off their rods, most members tend to fish the margins or the edge of the lily pads on No1, no problem with

that so long as you're on your rods and ready to strike and play the fish away from possible snags, if you're not then you lose a bit of tackle, the club possibly loses a beautiful and valuable fish. The number of complaints made by members about other members casting across to swims on the other side of the lake has been at a minimum, that's great, let's keep it that way please.

Working party date's for the next years working parties are shown at the bottom of the page. There will of course be a number of unofficial working parties, give Larry or myself a call if you want to find out when and what we're doing.

# Rowley Lake Report

After a bit of a shakey start the season finally got under way around the end of July after thunder, rain, lightning and 30 degree temperatures in June and early July.

Rowley likes the rain and a warm south westerly and when these arrived the fishing took off.

This is typically Rowley slight changes in the weather and temperature having immediate effect. This can work well in summer with rain after a hot spell and in the winter with the sudden coming of a mild spell but can have disastrous effects during autumn and late summer with high pressure and clear, cold nights. Time it right and you will be quids in.

The match in July saw a somewhat reduced attendance on last year but the Bream were feeding and I had the good fortune to win it with 3 fish of 2.4, 2.8 and 5.7.

The weather playing a key part as it was muggy, pouring with rain and the fish bubbling and boshing everywhere.

Sadly the match in October was cancelled due to lack of interest. This is a shame as I believe these matches, tongue in cheek though they may be, bring members together, who may never otherwise meet, to share some friendly banter and maybe even catch a few fish in a manner that they may not have done since childhood. The weights at the end of the day being secondary to having a bit of fun.

The new Bream went in back in January and we still await the right fish for our proposed stocking of Crucian Carp.

A number of Tench were caught although perhaps not so many as last year. Please let me know what you are catching as it helps to paint a picture of the general fishing overall. Remember the bailiffs and myself are not there 24/7 to witness all catches and we only get an inkling on what's coming out.

Some people have said that the fishing has gone right off. Personally I think not but unless we have regular input from those others catching we cannot reach any clear conclusions and act accordingly.

I had another go for the Perch in September and was rewarded with a 2.12 armour plated

warrior. Big Perch really are stunning fish and I believe there are others bigger than this. Indeed another long standing member had a 2.15 back in June. Another had a rumoured 4lb Roach but that's another story.

We continued to get the occasional visit from our poaching friends; mostly in the closed season. From various descriptions they sound like the same mob each time, but thanks to the vigilance of our bailiffs they seem to have disappeared since the season started.

We are indeed indebted to our bailiffs, John, Dave and Mark who put themselves in the firing line to protect our fish and fishing. Should you see anything or anyone suspicious please feel free to let us know so that we may follow things up and take any action that may be necessary.

Incidences of littering and fouling have been conspicuous by their absence this year again. This is great news but vigilance is still required and remember ALL litter, even if it is not yours, must be picked up and taken completely off site. Not as far as the car park, but home and into the bin. As a club we view any form of litter with zero tolerance. And if anyone is in any doubt yes teabags and fag ends ARE litter!

Litter loses fishing and if found guilty your permit to fish will be the first to go.

Access to the lake from the car park is by the woodland path through the gate only. Do not go across the field and shut and secure all gates.

This includes the main gate which has been unwittingly left unlocked on occasion. Please make sure the padlock is fully locked before you leave. The last thing we want is for any of our travelling friends to take up residence.

My thanks to all those who go the extra mile whether it be working parties, bailiffing or just general helping out and caring for the fishery. It really is appreciated.

# River Colne

Harrow Angling Society has negotiated with Yiewsley Angling Society (Y.A.S) limited amount of tickets to permit fishing on their River Colne at Iver.

The fishery runs South from Iver lane down to the footbridge at Little Britain lake. A small area for car parking can be found in Iver Lane just after the second hump backed bridge when approaching from the Cowley Road direction. The River contains all species of fish including Barbel, Chub, Trout, Tench, Dace, Perch, roach etc and should provide reasonable sport. Please observe the following rules when using this fishery.

There are 8 tickets and will be available for collection from a member of Y.A.S at his workplace in Uxbridge. he company is called METTS and is a truck repair facility in Arundel Road on the Uxbridge Industrial Estate a short distance from the fishery. His premises are open Monday to Friday 7am to 5pm and Saturday until mid-day. Our contact, Martin can be contacted on 01895 239834. Please be polite when inquiring for ticket availability. You will be required to leave your H.A.S permit as a deposit for the River permit when you collect it.

**Warning there is a clamping unit in operation on the road outside METTS. Members should park in METTS yard when collecting permits. HAS will not be responsible for any parking violations.**

# Harefield Pit 2 Report

Here we are again, the eagerly awaited report from Pit 2. In this report it is all about records.

Firstly, on one work part we had 15 people in attendance! Between us we got a lot of work done, no more so than on the Railway Bank where the path was gravelled and the "hump" flattened off to make it easier for "barrowing" around. Other work completed on the day included removing trees from the lake and a good ol' tidy up along that bank. Our thanks to all who turned up on all our working parties, your help is appreciated.

Come the afternoon of the 15th June the draw for the off was set for 3pm but by midday the crowd was swelling, a few superstars amongst them., by 3 there were 25 tickets in the hat with all anxious to see who would come out first! The "Gate" was considered to be the HOT swim and it just so happened that Stuart the Bailiff picked Les out of the hat, so he went in there. It mattered not though as another record was set and not one carp was caught throughout the whole of June!

The bream were playing ball early doors and for those fishing for them many a PB was broken, one fortunate angler absolutely smashing the club record out of sight! A carp angler had an accidental tench of 10lb 8oz and later another was caught that obliterated the then tench record.

As this year the weed was conspicuous by its absence the carp seemed to hold up in one area but some did start to get caught from all areas by mid July. At the present time the numbers of carp caught are well down on last year but the lumps were more than happy to have a trough up and both common and mirror carp club records were broken.

Only one other record worth reporting, our esteemed Editor is on course for his hat-trick of "cheque book and pens". Come on Leader, HURRY UP!

At this time of year the fishing has slowed a lot and a lot of the eager ones from the start don't seem to be around anymore. You never know though, it could be a good autumn so don't neglect the big pit in what many consider to be the

best part of the season.

As the weather cools people's attentions start to wander towards the predators. As always there's a lot of fry in the lake and if the many cormorants don't get them hopefully the pike and perch will and put on the weight to make it the "special" photo in the frost we all desire.

All in all it's been a good summer on the lake, no major incidents, only one knob head who left tackle up the tree on the Pylon and did not inform anyone, cheers fella! As always we ask, as we do in every magazine, that if you do lose tackle in bankside vegetation that you inform either the fishery management team or a bailiff. This is the most public of the club waters and a shared facility, it's easier to sort out if we are informed than risk the lease on the water when we are informed that there has been injury or death to wild life or another water user due to fishing tackle. The "ANTI" brigade have enough ammo against anglers as it is, do not be the one who adds bullets to their guns!

As always our thanks go out to our bailiffs for their efforts, we appreciate all that you do for us and for keeping the ambience of the lake the way it should be. We also thank all those regulars who fish the lake, because of how you all are it makes it the enjoyable special lake that it is!

For those who haven't experienced it yet but want to moan about it we say this, go down and put the effort in, we are a sociable bunch and information flows freely between everyone, but effort equals reward, don't expect it to be put on a plate for you if you've never wet a line in the water, nothing comes easy in life so go do some work and see what you could do!

As always, BONJOUR!

or post HAS C/O Lozical Media, 123 Yardley Ave,  
Pitstone, Beds, LU7 9BD

# A Good Cause....

Harrow member Andres Flatt has ventured into assisting raising monies for the charity St Dunstans and has set up the St Dunstans Carp Cup this year.

On Saturday 15th October 2011 the St. Dunstan's Carp Cup 2nd Round 24 hour match was held at Yateley South Lake. Round 1 (also at South Lake in May) was made more challenging by spawning and Round 2 wasn't much better!

Un-seasonally bright weather and high pressure scuppered hopes of a high catching match. Still 16 anglers took part including our the secretary Matthew Marchant, Rowley Baliff Dave Bernard and the editor myself.

An early lead was taken by myself and I took the "First Fish" bait prize, unfortunately losing three more fish due to technical issues with my mainline not helped by the weed.

The eventual winner Clive Betterton took just two fish to 15lb 4oz from the quiet back bay and left with over £100 of CCMOORE sponsored bait prizes. The overall winner was Mark Lester who over both matches took two fish to 14lb 10oz. Mark wins a pair of CHUB OUTKAST PLUS rods sponsored by HARDY GREYS.

St. Dunstan's are a charity who have been rehabilitating blind and partially sighted ex-Service men and women since the first World War, helping them lead independent and fulfilling lives.

A huge thank you to all the competitors and sponsors for their support with the events.

If you would like to fish any of the 2012 matches they will be held on two new venues tba and details can be obtained by emailing Andres [info@thewaterlog.net](mailto:info@thewaterlog.net).
